Digital Still Camera

Operating Instructions

Before operating the unit, please read this manual thoroughly, and retain it for future reference.

Owner's Record

The model and serial numbers are located on the bottom. Record the serial number in the space provided below. Refer to these numbers whenever you call upon your Sony dealer regarding this product.

Model No. MVC-CD1000
Serial No. ________________________

©2000 Sony Corporation
To prevent fire or shock hazard, do not expose the unit to rain or moisture.

WARNING
To prevent fire or shock hazard, do not expose the unit to rain or moisture.

For the Customers in the U.S.A.

CAUTION
The use of optical instruments with this product will increase eye hazard. As the laser beam used in this camera is harmful to eyes, do not attempt to disassemble the cabinet. Refer servicing to qualified personnel only.

Note:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Declaration of Conformity
Trade name: SONY
Model No.: MVC-CD1000
Responsible Party: Sony Electronics Inc.
Address: 1 Sony Drive, Park Ridge, NJ 07656 USA
Telephone No.: 201-930-6972

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

If you have any questions about this product, you may call: Sony Customer Information Services Center 1-800-222-SONY (7669) or write to: Sony Customer Information Services Center
12451 Gateway Boulevard Ft. Myers, Florida 33913

CAUTION
You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

WARNING
For the Customers in the U.S.A.

This symbol is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

CAUTION
The use of optical instruments with this product will increase eye hazard. As the laser beam used in this camera is harmful to eyes, do not attempt to disassemble the cabinet. Refer servicing to qualified personnel only.
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

The shielded interface cable recommended in this manual must be used with this equipment in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

**For the Customers in the United Kingdom**

A moulded plug complying with BS 1363 is fitted to this equipment for your safety and convenience.

Should the fuse in the plug supplied need to be replaced, a 5 AMP fuse approved by ASTA or BSI to BS 1362, (i.e. marked with or mark) must be used.

If the plug supplied with this equipment has a detachable fuse cover, be sure to attach the fuse cover after you change the fuse. Never use the plug without the fuse cover. If you should lose the fuse cover, please contact your nearest Sony service station.

**For the Customers in Germany**

This equipment complies with the EMC regulations when used under the following circumstances:

- Residential area
- Business district
- Light-industry district

(This equipment complies with the EMC standard regulations EN55022 Class B.)

**For the Customers in Canada**

**CAUTION**

TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS POLARIZED AC PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

**Attention**

The electromagnetic fields at the specific frequencies may influence the picture and sound of this camera.
Operating instructions
Before operating the unit, please read this manual thoroughly, and retain it for future reference.

Before you start reading this manual and operating the unit, check the model number.
As you read through this manual, buttons and settings on the camera are shown in capital letters.

e.g. Press DISPLAY.

This digital still camera uses 8 cm CD-Rs as recording media. “CD-R” mentioned above is indicated as “disc” in this manual.

We recommend that you use this camera with Mavica discs.

While the image is being recorded on the disc, the ACCESS lamp lights up (red). When this lamp is lit, do not shake or strike the camera.

Trial recording
Before you record one-time events, you may want to make a trial recording to make sure that the camera is working correctly.

Note on image data compatibility
This camera conforms with the Design Rules for Camera File Systems universal standard established by the JEIDA (Japan Electronic Industries Development Association).

No compensation for contents of the recording
Contents of the recording cannot be compensated for if recording or playback is not possible due to a malfunction of your camera, etc.

Precaution on copyright
Television programs, films, video tapes, and other materials may be copyrighted. Unauthorized recording of such materials may be contrary to the provision of the copyright laws.

Do not shake or strike the camera
In addition to malfunctions and inability to record images, this may render the discs unusable or image data breakdown, damage or loss may occur.

LCD screen, viewfinder, and lens
• The LCD screen and viewfinder are manufactured using high-precision technology. However, there may be some tiny black points and/or bright points (red, blue or green in color) that constantly appear on the LCD screen or on the viewfinder. These points are normal in the manufacturing process and do not affect the recording in any way. Over 99.99% of the pixels are operational for effective use.
• Be careful when placing the camera near a window or outdoors. Exposing the LCD screen, viewfinder, or lens to direct sunlight for long periods may cause malfunctions.

Do not get the camera wet
When taking pictures outdoors in the rain or under similar conditions, be careful not to get the camera wet. If moisture condensation occurs, refer to page 64 and follow the instructions on how to remove it before using the camera.

Back up recommendation
To avoid the potential risk of data loss, always copy (back up) data to a disc.

Getting started

Identifying the parts

See the pages in parentheses for details of operation.

1. Flash (22)
2. Built-in microphone
   Do not touch while recording.
3. Self-timer lamp/Recording lamp (22, 24)
4. Shutter button (18, 24)
5. Zoom lever (20)
6. Photocell window for flash
   Do not block while recording.
7. Focus ring (50)
8. Lens
9. DIGITAL I/O jack (34)
10. PROGRAM AE button (51)
11. WHITE BALANCE button (53)
12. Accessory shoe
13. OPEN (FLASH) button (22)
14. (One-push white balance) button (53)
15. (External flash) jack
16. Disc cover OPEN lever (15)
17. Lens cap (supplied)
18. STEADY SHOT ON/OFF switch (21)
19. FOCUS AUTO/MANUAL switch (50)
20. A/V OUT (MONO) jack (59)
   Audio output is monaural.
21. PROGRAM AE +/- buttons (51)
Getting started

Model name: [MVC-CD1000]

Attaching the shoulder strap

1. (Macro) button (50)
2. (Flash) button (22)
3. Viewfinder (19)
4. Speaker
5. DISPLAY button (21)
6. Disc window
7. Viewfinder adjustment lever (19)
8. VOLUME +/– buttons (27)
9. LCD screen
10. Hooks for strap
11. SPOT METER button (52)
12. Control button (40)
13. ACCESS lamp (18)

Do not shake or strike the camera while the ACCESS lamp is lit.

14. PLAY/STILL/MOVIE selector (40)
15. DC IN jack (9, 11)
16. POWER ON/OFF (CHG) lamp (9)
17. POWER switch (12)
18. LCD (ON/OFF) button (19)
19. Battery cover/PUSH button (bottom surface) (8)
20. Tripod receptacle (bottom surface)

Use a tripod with a screw length of less than 7/32 inch (6.5 mm). You will be unable to firmly secure the camera to tripods having longer screws, and may damage the camera.
Preparing the power supply

Installing the battery pack

Your camera operates only with the NP-F550 (supplied) “InfoLITHIUM” battery pack* (L series).

To remove the battery pack

Open the battery cover. Slide the battery eject lever rightward, and remove the battery pack.

Be careful not to drop the battery pack when removing it.

* What is “InfoLITHIUM”?*

“InfoLITHIUM” is a lithium ion battery pack which can exchange information such as battery consumption with compatible video equipment. “InfoLITHIUM” L series battery packs have the mark. “InfoLITHIUM” is a trademark of Sony Corporation.
Getting started

Charging the battery pack

When the camera is turned on, you cannot charge the battery pack. Be sure to turn off the power of the camera.

1. Insert the battery pack into your camera.
2. Open the DC IN cover and connect the DC connecting plug to the DC IN jack of your camera with the ▲ mark facing up.
3. Connect the power cord (mains lead) to the AC power adaptor and then to a wall outlet ( mains).

   The POWER ON/OFF (CHG) lamp (amber) above the control button lights up when charging begins. When the POWER ON/OFF (CHG) lamp goes off, normal charge is completed. For full charge, which allows you to use the battery longer than usual, leave the battery pack inserted for about one hour after normal charge is completed.

Battery remaining indicator

The LCD screen or viewfinder on the camera shows the remaining time for which you can still record or play back images. This indication may not be entirely accurate depending on the conditions of use and the operating environment.
**Auto power-off function**

If you do not operate the camera for about three minutes during recording, the camera turns off automatically to prevent wearing down the battery pack. To use the camera again, slide the POWER switch downward to turn on the camera again.

**Charging time**

<table>
<thead>
<tr>
<th>Battery pack</th>
<th>Full charge (min.)</th>
<th>Normal charge (min.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>NP-F550 (supplied)</td>
<td>Approx. 210</td>
<td>Approx. 150</td>
</tr>
</tbody>
</table>

Approximate time to charge a completely discharged battery pack using the AC-L10A/L10B/L10C AC power adaptor. (Lower temperatures require a longer charging time.)

**Battery life and number of images that can be recorded/played back**

**STILL mode recording/playback**

<table>
<thead>
<tr>
<th>Battery pack</th>
<th>Battery life (min.)</th>
<th>Number of images</th>
</tr>
</thead>
<tbody>
<tr>
<td>Continuous recording*</td>
<td>NP-F550 (supplied)</td>
<td>Approx. 100 (90)</td>
</tr>
<tr>
<td>Continuous playback**</td>
<td>NP-F550 (supplied)</td>
<td>Approx. 120 (110)</td>
</tr>
</tbody>
</table>

Approximate battery life and number of images that can be recorded/played back with a fully charged battery pack at a temperature of 77 °F (25 °C), 640×480 image size and in NORMAL recording mode. Numbers in parentheses indicate the time when you use a normally charged battery pack.

* Recording at about 5-second intervals
** Playing back single images continuously at about 7-second intervals

**MOVIE mode recording**

<table>
<thead>
<tr>
<th>Battery pack</th>
<th>Battery life (min.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Continuous recording</td>
<td>NP-F550 (supplied)</td>
</tr>
</tbody>
</table>

Approximate time that can be recorded with a fully charged battery pack at a temperature of 77 °F (25 °C) and 160×112 image size. Numbers in parentheses indicate the time when you use a normally charged battery pack.

**Notes**

- The battery life and number of images will be decreased when using at low temperature, using the flash, turning the power on/off frequently, or using the zoom.
- The number of images shown on tables above is as a guide. The number may be smaller depending on conditions.
- If sufficient battery remaining time is indicated but the battery power runs out, fully charge the battery using the full charge procedure.
• Do not short the DC plug of the AC power adaptor with a metallic object, as this may cause malfunction.
• Do not expose the battery pack to water.

**Using the AC power adaptor**

1. Open the DC IN cover and connect the DC connecting plug to the DC IN jack of your camera with the ▲ mark facing up.

2. Connect the power cord (mains lead) to the AC power adaptor and then to a wall outlet (mains).

**Using a car battery**

Use Sony DC adaptor/charger.
Setting the date and time

When you first use your camera, set the date and time. If these are not set, the CLOCK SET screen appears whenever you turn on your camera for recording.

1. Slide the POWER switch downward to turn on the power.
   The POWER ON/OFF (CHG) (green) lamp lights up.

2. Press ▼ on the control button.
   The menu bar appears on the LCD screen or on the viewfinder.

3. Select [SETUP] with ▲ on the control button, then press the center ◄.

4. Select [CLOCK SET] with ▲/▼ on the control button, then press the center ◄.
Getting started

1. Select the desired date display format with ▲/▼ on the control button, then press the center ■.
   Select from [Y/M/D] (year/month/day), [M/D/Y] (month/day/year), or [D/M/Y] (day/month/year).

2. Select the year, month, day, hour or minute item you want to set with ◄► on the control button.
   The item to be set is indicated with ▲/▼.

3. Set the numeric value with ▲/▼ on the control button, then press the center ■ to enter it.
   After entering the number, ▲/▼ moves to the next item. If you selected [D/M/Y] in step 2, set the time on a 24-hour cycle.

4. Select [ENTER] with ◄ on the control button, then press the center ■ at the desired moment to begin clock movement.
   The date and time are entered.

To cancel the date and time setting
Select [CANCEL] with ▲/▼◄► on the control button, then press the center ■.
Inserting a disc

You can use only the 8 cm CD-Rs that have this mark.

1. While sliding the lock tab to the left, slide down the disc cover OPEN lever.
   Open the disc cover by your hand after the cover is unlocked.

2. Place a disc with the blue side down.
   Push down the center of the disc until it clicks. When installing, do not push with too much force and do not touch the pickup lens.

3. Close the disc cover.
Removing the disc

While sliding the lock tab to the left, slide down the disc cover OPEN lever, and open the disc cover after the cover is unlocked. Then, remove the disc as illustrated below.

Notes
- Before removing the disc, be sure to check that the disc is not rotating.
- Do not open the disc cover while the ACCESS lamp is lit. Otherwise, the recorded image may be damaged or the disc may become unusable.
Basic operations  ► Recording

**Initializing a disc (INITIALIZE)**

When you use a new disc, you have to initialize the disc. Slide the POWER switch downward to turn on the power before initializing a disc.

1. Press ▲ on the control button.
   The menu bar appears on the LCD screen or on the viewfinder.

2. Select [FILE] with ▶ on the control button, then press the center ◄.

3. Select [DISC TOOL] with ▲ on the control button, then press the center ◄.
To cancel the initialization
Select [CANCEL] with \( \downarrow \) on the control button, then press the center \( \blacklozenge \).

What is initialization?
The initialization is required to record images on a disc.
In case that you have executed the finalization (page 29) to view images on a CD-ROM drive, you can record images on the disc if you execute the initialization again. Images previously recorded will remain on the disc.
Recording still images

To record still images, slide the POWER switch downward to turn on the power and insert a disc.

1. Set the PLAY/STILL/MOVIE selector to STILL.

2. Press and hold the shutter button halfway down and check the image.
   - While the AE lock indicator (green) is flashing, the image is frozen, however, the image is not yet recorded. When the camera finishes the automatic adjustments*, the AE lock indicator lights up and the camera is ready for recording.
   - To cancel the recording, release the shutter button.

3. Press the shutter button fully down.
   - The shutter clicks and the image is recorded on the disc. After “RECORDING” goes off, you can do another recording.

* The exposure and focus are automatically adjusted. The focus is not automatically adjusted when the camera is in manual focus mode.

For the number of images you can record on a disc

See page 47.
Notes
- You can delete images recorded on a disc, however, even if you delete images, the disc remaining space does not increase.
- When recording bright subjects, the color of the LCD screen or the viewfinder may change after the AE is locked, however, this will not affect the recorded image.
- After you change the disc, it may take about ten seconds to get ready for recording.

Recording images with the viewfinder
Adjust the viewfinder adjustment lever until the image appears clearly within the viewfinder, then record the image.

Note
The viewfinder display is automatically turned off when your face is not near the viewfinder.

To turn off the LCD screen
Press LCD (ON/OFF) to turn off the LCD screen. The battery life will be longer.

Notes
- You cannot turn off the LCD screen when the demonstration is being executed (page 46).
- When both the LCD screen and viewfinder displays are turned off, only the following will operate: LCD (ON/OFF) button, POWER switch, the PLAY/STILL/MOVIE selector, FOCUS AUTO/MANUAL switch, STEADY SHOT ON/OFF switch, focus ring, and shutter button.
Adjusting the brightness of the LCD screen

Adjust the brightness with the [LCD BRIGHT] item in the menu settings (page 46). This adjustment does not affect the brightness of the images recorded on the disc.

Checking the last recorded image (Review)

Clear the menu bar (page 41), and press ▼ on the control button. To return to the normal recording mode, press lightly on the shutter button or select [RETURN] with ◄► on the control button and then press the center ■. To delete the image, select [DELETE] on the review screen with ◄► on the control button, then press the center ■. And select [OK] with ▲ on the control button, then press the center ■. However, even if you delete images, the disc remaining space does not increase.

Using the zoom feature

If you cannot get a sharp focus on a close subject

Slide the zoom lever to the W side and move closer to the subject until the focus is sharp.

Minimum focal distance to the subject

W side: About 9 7/8 inches (25 cm) or more
T side: About 31 1/2 inches (80 cm) or more
To record even closer subjects, see page 50.

Digital zoom function

This camera has a digital zoom function. Digital zoom enlarges the image by digital processing, and it starts to function when the zoom exceeds 10x.

The T-side of the bar shows the digital zooming zone.
Using digital zoom

- The maximum zoom magnification is 20x.
- Digital zooming may deteriorate the picture quality. When digital zoom is not necessary, set [DIGITAL ZOOM] to [OFF] in the menu settings (page 45).

Note
Digital zoom does not work for moving images.

Activating the SteadyShot function

When the SteadyShot function is working, the camera compensates for camera-shake.

Set the STEADY SHOT ON/OFF switch to ON. The (SteadyShot) indicator appears on the LCD screen or on the viewfinder.

Notes
- The SteadyShot function will not correct excessive camera-shake.
- If you use a wide conversion lens (optional), this lens may influence the SteadyShot function.

LCD screen or viewfinder indicators during recording

Press DISPLAY to turn on/off the indicators on the LCD screen or on the viewfinder. See page 75 for a detailed description of the indicators.

Notes
- You cannot turn off the (self-timer) indicator and some of the indicators used in advanced operations.
- The indicators on the LCD screen or on the viewfinder are not recorded.
Using the self-timer

When you use the self-timer function, the subject is recorded 10 seconds after you press the shutter button.

Select  on the LCD screen with  or  on the control button, then press the center . The (self-timer) indicator appears on the LCD screen or on the viewfinder, and the subject is recorded 10 seconds after you press the shutter button. The self-timer lamp flashes after you press the shutter button until the image is recorded.

Recording images with the flash

Press OPEN (FLASH) to pop up the flash. The initial setting is AUTO (no indication). In this mode, the flash automatically strobes when the surroundings become dark. When you change the flash mode, press  (Flash) repeatedly so that the flash mode indicator appears on the LCD screen or on the viewfinder. This setting can be set only when the flash is popped up.

Set the PLAY/STILL/MOVIE selector to STILL. Each time you press the  button, the indicator changes as follows.

- (No indication) → (Auto red-eye reduction) → (Forced flash) → (No flash) → (No indication)

- Auto red-eye reduction: The flash preparatively strobes before recording to reduce the red-eye phenomenon.
- Forced flash: The flash strobes regardless of the surrounding brightness.
- No flash: The flash does not strobe.

You can change the amount of the flash light with [FLASH LEVEL] in the menu settings (page 45).
Notes

- The recommended shooting distance is 23 5/8 inches to 8 1/3 feet (0.6 to 2.5 m).
- Attaching a conversion lens (optional) may block the light from the flash and the recorded image may be eclipsed.
- You cannot use the built-in flash and an external strobe at the same time.
- The $ indicator appears when the flash is not popped up under situations that you should use the flash.
- Auto red-eye reduction may not produce the desired red-eye reduction effects depending on individual differences, the distance to the subject, if the subject does not see the pre-strobe, or other conditions. In addition, red-eye reduction effects are also difficult to obtain if you select a slow shutter speed in shutter priority mode of the PROGRAM AE function.
- The flash effect is not obtained easily when you use forced flash in a bright location.
Recording moving images

Moving images with audio are recorded in MPEG format.
To record moving images, slide the POWER switch downward to turn on the power and insert a disc.

1. Set the PLAY/STILL/MOVIE selector to MOVIE.

2. Press the shutter button fully down.
   "REC" appears on the LCD screen or on the viewfinder, and the image and sound are recorded on the disc. The recording lamp lights up during recording.

   **If you press the shutter button momentarily**
   The image and sound are recorded for 5 seconds. The recording time can be set to 10 or 15 seconds with [REC TIME SET] in the menu settings (page 44).

   **If you hold the shutter button down**
   The image and sound are recorded while the shutter button is held down for up to 60 seconds. However, when [IMAGE SIZE] in the menu settings is set to [320 (HQ)] or [320×240], the maximum recording time is 15 seconds (page 47).

Adjusting the brightness of the LCD screen, zooming or using the self-timer

See page 20 to 22.

LCD screen or viewfinder indicators during recording

Press DISPLAY to turn on/off the indicators on the LCD screen or on the viewfinder. These indicators are not recorded. See page 75 for a detailed description of the indicators.
Playing back still images

1. Set the PLAY/STILL/MOVIE selector to PLAY.
   The last recorded image (still or moving) appears on the LCD screen or on the viewfinder.

2. Press ▲ on the control button to display the menu bar on the LCD screen or on the viewfinder.

3. Select the desired still image with the control button.
   Press ▼/◄/◄/◄ on the control button to select ►/►/►/► on the LCD screen or on the viewfinder, then press ▲/▲.
   ▼: To display the preceding image.
   ►: To display the next image.

When the menu bar is not displayed
You can directly select and play back the image with◄/◄ on the control button.

LCD screen or viewfinder indicators during still image playback

Press DISPLAY to turn on/off the indicators on the LCD screen or on the viewfinder.
See page 76 for a detailed description of the indicators.
Playing back moving images

1. Set the PLAY/STILL/MOVIE selector to PLAY.
   The last recorded image (still or moving) appears on the LCD screen or on the viewfinder.

2. Press \( \uparrow \) on the control button to display the menu bar on the LCD screen or on the viewfinder.

3. Select the desired moving image with the control button.
   Moving images are displayed one size smaller than still images.
   Press \( \uparrow \downarrow \leftarrow \rightarrow \) on the control button to select \( \leftarrow \rightarrow \) on the LCD screen or on the viewfinder, then press \( \leftarrow \rightarrow \) to display the preceding image.
   \( \uparrow \rightarrow \) to display the next image.

4. Select the \( \triangleright \) (playback) button on the LCD screen or on the viewfinder with \( \uparrow \) on the control button, then press the center \( \uparrow \).
   The moving image and sound are played back.
   During playback, \( \triangleright \) (playback) changes to \( \uparrow \) (pause).
To pause playback
Select II (pause) on the LCD screen or on the viewfinder with ▲/▼/◄/► on the control button, then press the center ■.

When the menu bar is not displayed
You can directly select the image with ▼/► on the control button, and play back the image and sound by pressing the center ■. When you press the center ■ during playback, playback is paused.

Moving images recorded with the image of [320 (HQ)]
The images are displayed over the entire screen in steps 3 and 4.

Adjusting the volume of the built-in speaker
Press VOLUME+/– to adjust the volume.

LCD screen or viewfinder indicators during moving image playback
Press DISPLAY to turn on/off the indicators on the LCD screen or on the viewfinder. See page 76 for a detailed description of the indicators.
Viewing images using a personal computer

You can view data with your camera on a personal computer and attach it to e-mail. This section describes the general method for viewing images on a personal computer. Be sure to also see the operation manuals for your personal computer and application software.

For Windows users

A Viewing images with a CD-ROM drive (page 33)
Finalize the disc beforehand (page 29).

B Viewing images with a personal computer connected with the USB cable (page 33)
You do not need to finalize the disc. You have to install the USB driver and the software, DirectCD included in the supplied CD-ROM. For details on DirectCD, refer to the software operating instructions of DirectCD.

C Viewing images using a CD-R/CD-RW drive (page 37)
You do not need to finalize the disc. You have to install the software, DirectCD included in the supplied CD-ROM.

For Macintosh users

Viewing images with a CD-ROM drive (page 37)
Finalize the disc beforehand (page 29). You have to install the driver, Adaptec UDF Volume Access included in the supplied CD-ROM.

Notes on using your personal computer

Software
• Data recorded with your camera is stored in the following formats. Make sure that applications that support these file formats are installed on your personal computer.
  — Still image (except TEXT mode and uncompressed mode): JPEG format
  — Moving image/Voice memo: MPEG format
  — Uncompressed mode still image: TIFF mode
  — Still image in TEXT mode: GIF format.
• Depending on your application software, the file size may increase when you open a still image file.
• When you load an image modified using the supplied retouch software from your personal computer to the camera, the image format will differ so the “FILE ERROR” message may appear and you may be unable to open the file.
Communications with your personal computer

Communications between your camera and your personal computer may not recover after recovering from Suspend, or Sleep.

• Windows and Windows NT, ActiveMovie, DirectShow are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.
• Macintosh and Mac OS, QuickTime are trademarks of Apple Computer, Inc.
• DirectCD is a trademark of Adaptec, Inc.
• All other product names mentioned herein may be the trademarks or registered trademarks of their respective companies. Furthermore, “™” and “®” are not mentioned in each case in this manual.

Preparing for viewing images on CD-ROM drives (FINALIZE)

You can play back the disc recorded with this camera on CD-ROM drives. You have to execute the finalization before viewing images on a CD-ROM drive. A disc that has not been executed the finalization cannot be read with CD-ROM drives.

What is finalization?

• The finalization is required to view images on a CD-ROM drive.
• You can record new images on the finalized disc if you execute the initialization on it again. You have to execute the finalization to view new images on a CD-ROM drive. Each time you execute the finalization, approximate 13.5 MB of the disc will decrease. We recommend that you execute the finalization onto compiled data at a time.
• You can execute the finalization onto the disc later, even if you remove it from the camera.

Executing the finalization

1. Press ▲ on the control button.
   The menu bar appears on the LCD screen or on the viewfinder.

2. Select [FILE] with ▶ on the control button, then press the center ■.
Select [DISC TOOL] with \( \uparrow \) on the control button, then press the center \( \blacktriangle \).

Select [FINALIZE] with \( \uparrow \) on the control button, then press the center \( \blacktriangle \).

Select [OK] with \( \uparrow \) on the control button, then press the center \( \blacktriangle \).

“PLACE ON LEVEL SURFACE” appears on the LCD screen or on the viewfinder. Be sure to avoid any vibration during the finalization.

Select [OK] with \( \uparrow \) on the control button, then press the center \( \blacktriangle \).

Finalization starts and the disc remaining indicator changes from \( \bullet \bullet \bullet \bullet \bullet \) to \( \bullet \bullet \bullet \bullet \bullet \).

To cancel the finalization
Select [CANCEL] with \( \downarrow \) on the control button, then press the center \( \blacktriangle \). Once the finalization starts, you cannot cancel it.

Notes
• It takes for about one minute to execute the finalization. Do not shake or jar the camera during this operation. Place the camera on a stable surface during the finalization.
• When you execute the finalization, we recommend that you use the an external power source (page 11).
Using the supplied 8 cm CD adaptor

When your disc drive does not conform to 8 cm CD or is an upright type, use the supplied 8 cm CD adaptor.

1. Slide the disc into the inner groove and under two of the tabs on the inner circle of adaptor in the numbered order.

   - Printed side of the disc (The other blue side is recordable side.)
   - Printed side of the adaptor (SONY is printed on this side and the other side is the luster side.)

2. Pull the third tab out away from the disc and the disc will slip into place. Release the third tab and the disc will be held firmly in place.
Check that the disc is set correctly in the grooves of the adaptor, that all the tabs are even with the surface of the adaptor, and that the disc is not protrude from the adaptor.

**Notes**
- The supplied adaptor may not be used with your disc drive. For details, refer to the operating instructions of the disc drive.
- Use the adaptor at a low-speed (8-speed or lower).
- Do not place the adaptor under direct sunlight or near the heat.
- The adaptor is only used with Mavica discs. This cannot be used with other 8 cm CD-Rs.

**Recommended Windows environment**

- **OS**: Microsoft Windows 98, Windows 98SE
  - Standard installation is required.
  - Operation is not assured in an environment upgraded from:
    - Windows 3.1, Windows 95 to Windows 98
    - Windows 98 to Windows 98SE
- **CPU**: MMX Pentium 200 MHz or faster
- The USB connector must be provided as standard.
- ActiveMovie (DirectShow) must be installed (to play back moving pictures)

**Notes**
- Operations are not guaranteed if you connect two or more USB equipment to a single personal computer at the same time (except for the USB keyboard and mouse which are provided as standard), or when using a hub.
- Depending on the type of USB equipment that is used simultaneously, some equipment may not operate.
- Operations are not guaranteed for all the recommended computer environments mentioned above.
A  Viewing images with a CD-ROM drive
   Finalize the disc beforehand (page 29).

For Windows 98 users

1  Start up your personal computer and insert the disc into the CD-ROM drive of your personal computer.

2  Open [ My Computer] and double click the drive recognizing the camera (Example: [CD-ROM (D:)]).

3  Double-click the desired data file.

B  Viewing images with a personal computer connected with the USB cable

Once you install DirectCD included in the supplied CD-ROM, you do not need to finalize the disc to view images on the disc. You can exchange data between the camera and a computer using the supplied USB cable and CD-ROMs.

Installing the USB driver

Before connecting your camera to your personal computer, install the USB driver to the computer. The USB driver is contained in the supplied CD-ROM (SPVD-001).

For Windows 98 users

1  Turn on your personal computer and allow Windows 98 to load.

2  Insert the supplied CD-ROM (SPVD-001) in the CD-ROM drive of your personal computer
   If the setup screen of DirectCD appears, click [Finish] on the screen.
3 Connect the DIGITAL I/O jack on your camera with the USB connector on your personal computer using the supplied USB cable.

4 Insert a disc into your camera, connect the AC power adaptor and turn on your camera. “PC MODE” appears on the LCD screen or on the viewfinder of your camera and the camera is set to communication standby mode. Your personal computer recognizes the camera, and the Windows 98 Add Hardware Wizard starts.

5 Follow the on-screen messages to specify the CD-ROM drive and install the USB driver.
   ① Check that the Add Hardware Wizard is displayed, then click [Next].
Select the option [Search for the best driver for your device. [Recommended].] in the window, then click [Next].

Check that the option [CD-ROM] is selected, then click [Next].

After the location of the driver is searched, click [Next]. File copy starts.

After [Windows has finished installing the software that your new hardware device requires.] is displayed, click [Finish]. The Add Hardware Wizard starts twice because two different USB drivers are installed. Repeat steps ② to ⑤ again.

**Viewing images**

When you view images on the disc which has not been finalized, you have to install DirectCD included in the supplied CD-ROM. For details on DirectCD, refer to the software operating instructions of DirectCD.

**For Windows 98 users**

① Turn on your personal computer and allow Windows 98 to load.
Connect the DIGITAL I/O jack on your camera with the USB connector on your personal computer using the supplied USB cable.

Insert a disc into your camera, connect the AC power adaptor to your camera and then to a wall outlet (mains), and turn on the power of your camera.

“PC MODE” appears on the LCD screen or on the viewfinder of the camera.

Open [My Computer] on Windows 98 and double click the newly recognized drive. (Example: [Removable Disk (D:)]) The folders inside the disc are displayed.

Select and double-click the desired image/sound file from the folder.
For the detailed folder and file name, see “Image file storage destinations and image file names” (page 39).

<table>
<thead>
<tr>
<th>Desired file type</th>
<th>Double-click in this folder</th>
</tr>
</thead>
<tbody>
<tr>
<td>Still image</td>
<td>“Dcim” folder → “100msdcf” folder** → Image file</td>
</tr>
<tr>
<td>Moving image*</td>
<td>“Msony” folder → “Moml0001” folder** → Image file</td>
</tr>
<tr>
<td>Audio</td>
<td>“Msony” folder → “Momlv100” folder** → Audio file</td>
</tr>
<tr>
<td>E-mail image (uncompressed)</td>
<td>“Msony” folder → “lmcif100” folder** → Image file</td>
</tr>
</tbody>
</table>

* Copying a file to the hard disk of your personal computer before viewing is recommended. If you play back the file directly from the “disc,” the image and sound may break off.

** When these file names are described in capital letters to distinguish the small letter “l” and the number “1,” these are shown as follows: 100MSDCF, MOML0001, MOMLV100, IMCIF100.
Copying a file in the disc to a personal computer
Select the desired file, and drag it to the desired drive or folder.

Copying a file in a personal computer to a disc
Once you install DirectCD included in the supplied CD-ROM, you can select the desired file, and drag it to the disc. To view a image with this camera, the file name format must be as follows, “DSC\####.JPG”. For details, see "Image file storage destinations and image file names" (page 39).

Viewing images using a CD-R/CD-RW drive
You do not need to finalize the disc. You have to install DirectCD included in the supplied CD-ROM. For details on DirectCD, refer to the software operating instructions of DirectCD.

Viewing images on a Macintosh computer

Recommended Macintosh environment
Macintosh computer with the Mac OS 8.5.1/8.6/9.0 standard installation
However, note that the update to Mac OS 9.0 should be used for the following models.
• iMac with the Mac OS 8.6 standard installation and a slot loading type CD-ROM drive
• iBook or G4 with the Mac OS 8.6 standard installation
QuickTime 3.2 or newer must be installed (to play back moving pictures).

Note
Operations are not guaranteed for all the recommended computer environments mentioned above.

Viewing images with a CD-ROM drive
Finalize the disc beforehand (page 29). You have to install the driver, Adaptec UDF Volume Access included in the supplied CD-ROM (SPVD-001).

For Macintosh users

1. Start up your personal computer and allow the Mac OS to load.
2. Insert the supplied CD-ROM (SPVD-001) in the CD-ROM drive of your personal computer.
3. Double-click the CD-ROM drive icon to open the window.
4. Double-click the icon of the hard disk containing the OS to open the window.
Move the driver, “Adaptec UDF Volume Access” from the window opened in step 3 to “System Folder” folder in the window opened in step 4 (drag and drop).

When “Put these items into the Extensions folder?” appears, click “OK.”

Restart your personal computer.

**Viewing images**

1. Start up your personal computer and insert the disc into the CD-ROM drive of your personal computer.

2. Double click the disc folder.

3. Double-click the desired data file.
**Image file storage destinations and image file names**

Image files recorded with your camera are grouped in folders by recording mode. Images in a disc have different file names. The meanings of the file names are as follows. □□□□□□ stands for any number within the range from 0001 to 9999.

For Windows 98 users (The drive recognizing the camera is [D:].)

<table>
<thead>
<tr>
<th>Folder</th>
<th>File</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>100msdcf</td>
<td>DSC□□□□□□.JPG</td>

</table>

The numerical portion of the following files are the same.
- An image file recorded in E-MAIL mode and its corresponding small-size image file
- An uncompressed image file recorded in TIFF mode and its corresponding image file
- An image file recorded in VOICE mode and its corresponding audio file
Advanced operations

Before performing advanced operations

This section describes the basic control methods that are frequently used for “Advanced operations.”

How to use the PLAY/STILL/MOVIE selector

The PLAY/STILL/MOVIE selector selects whether you can use your camera to record or to play back and edit images. Set the selector as follows before starting to operate your camera.

How to use the control button

The control button is used to select the buttons, images and menus displayed on the LCD screen or on the viewfinder of your camera and modify the settings. The operation methods that are frequently used for “Advanced operations” are described below.
Before performing advanced operations

You cannot clear the menu bar on the INDEX screen (page 56).

Selecting items or images on the LCD screen or on the viewfinder

1. Press ▲▼◄► on the control button to select the item you want to set or the image you want to display.

   The color of the selected item or the frame of the selected image changes from blue to yellow.

2. Press the center ■ to enter the item.

   Repeat steps 1 and 2 to execute each function.

The “Advanced operations” section of this manual refers to selecting and entering items by the above procedure as “Select [item name].”
How to change the menu settings

Some of the advanced operations for your camera are executed by selecting menu items displayed on the LCD screen or on the viewfinder with the control button.

1. Press ▲ on the control button to display the menu bar.
   The menu bar appears as follows according to the position of the PLAY/STILL/MOVIE selector.

2. Select the desired item with ▲/▼/◄/► on the control button, then press the center ■.
   The color of the selected item changes from blue to yellow, and when you press the center ■, the settings that can be set for its item are displayed.

3. Select the desired setting with ▲/▼/◄/► on the control button, then press the center ■.

To cancel the setup
Press ▼ on the control button repeatedly until the LCD screen or on the viewfinder returns to the menu bar display in step 1. To clear the menu bar, press ▼ again.
Menu settings

Menu items that can be modified differ depending on the position of the PLAY/STILL/MOVIE selector. The LCD screen or viewfinder shows only the items you can operate at the moment. Initial settings are indicated with ■.

😊 (self-timer)
Records with the self-timer (page 22).

### ↘️ (Return) (Only in PLAY (INDEX) mode)

Returns to PLAY (single) mode.
Various recording

Setting the image size (IMAGE SIZE)

1 Set the PLAY/STILL/MOVIE selector to MOVIE or STILL.
2 Select [FILE] and then [IMAGE SIZE] from the menu.
3 Select the desired image size.

Still image sizes:
- 1600×1200, 1600 (3:2)*, 1024×768, 640×480
  * The image is recorded in the ratio of three to two to fit the printing paper size.

Moving image sizes:
- 320 (HQ)*, 320×240, 160×112
  * High Quality mode

</tr>
<tr>
<td>160×112</td>
<td>Approx. 5100 (60)** sec</td>
</tr>
</tbody>
</table>

* When [REC MODE] is set to [NORMAL].
** Numbers in parentheses indicate the maximum time in a continuous recording.

Notes
- You can delete images recorded on a disc, however, even if you delete images, the disc remaining space does not increase.
- The number of images recordable on a disc may decrease depending on conditions.
Recording still images for e-mail (E-MAIL)

The E-MAIL mode records a small-size (320×240) image at the same time as a still image. Small-size images are convenient for e-mail transmission, etc.

1 Set the PLAY/STILL/MOVIE selector to STILL.
2 Select [FILE], [REC MODE], and then [E-MAIL] from the menu.
3 Record the image.

The number of images that you can record on a disc in E-MAIL mode

<table>
<thead>
<tr>
<th>Image size</th>
<th>Number of images</th>
</tr>
</thead>
<tbody>
<tr>
<td>1600×1200</td>
<td>Approx. 140</td>
</tr>
<tr>
<td>1600 (3:2)</td>
<td>Approx. 150</td>
</tr>
<tr>
<td>1024×768</td>
<td>Approx. 300</td>
</tr>
<tr>
<td>640×480</td>
<td>Approx. 730</td>
</tr>
</tbody>
</table>

To return to normal recording mode
Select [NORMAL] in step 2.

Adding audio files to still images (VOICE)

1 Set the PLAY/STILL/MOVIE selector to STILL.
2 Select [FILE], [REC MODE], and then [VOICE] from the menu.
3 Record the image. If you press and release the shutter button, sound is recorded for five seconds. If you hold down the shutter button, sound is recorded until you release the shutter button for up to 40 seconds.

The number of images that you can record on a disc in VOICE mode

<table>
<thead>
<tr>
<th>Image size</th>
<th>Number of images</th>
</tr>
</thead>
<tbody>
<tr>
<td>1600×1200</td>
<td>Approx. 130</td>
</tr>
<tr>
<td>1600 (3:2)</td>
<td>Approx. 150</td>
</tr>
<tr>
<td>1024×768</td>
<td>Approx. 270</td>
</tr>
<tr>
<td>640×480</td>
<td>Approx. 620</td>
</tr>
</tbody>
</table>

To return to normal recording mode
Select [NORMAL] in step 2.
Recording text documents (TEXT)

Text is recorded in black and white GIF format to provide a clearer image.

1. Set the PLAY/STILL/MOVIE selector to STILL.
2. Select [FILE], [REC MODE], and then [TEXT] from the menu.
3. Record the image.

The number of images that you can record on a disc in TEXT mode

<table>
<thead>
<tr>
<th>Image size</th>
<th>Number of images</th>
</tr>
</thead>
<tbody>
<tr>
<td>1600x1200</td>
<td>Approx. 1370</td>
</tr>
<tr>
<td>1600 (3:2)</td>
<td>Approx. 1450</td>
</tr>
<tr>
<td>1024x768</td>
<td>Approx. 1510</td>
</tr>
<tr>
<td>640x480</td>
<td>Approx. 1570</td>
</tr>
</tbody>
</table>

To return to normal recording mode
Select [NORMAL] in step 2.

Notes
• If the subject is not evenly illuminated, you may be unable to record a clear image.
• Writing and reading data take more time than normal recording.
• The image will be displayed in monochrome in TEXT mode.

Recording uncompressed images (TIFF)

This mode simultaneously records still images in both TIFF format (uncompressed) and JPEG format (compressed).

1. Set the PLAY/STILL/MOVIE selector to STILL.
2. Select [FILE], [REC MODE], and then [TIFF] from the menu.
3. Record the image.

The number of images that you can record on a disc in TIFF mode

<table>
<thead>
<tr>
<th>Image size</th>
<th>Number of images</th>
</tr>
</thead>
<tbody>
<tr>
<td>1600x1200</td>
<td>Approx. 20</td>
</tr>
<tr>
<td>1600 (3:2)</td>
<td>Approx. 22</td>
</tr>
</tbody>
</table>

To return to normal recording mode
Select [NORMAL] in step 2.

Notes
• JPEG images are recorded in the image size selected by the [IMAGE SIZE] menu. TIFF images are recorded in [1600x1200] size other than when [1600 (3:2)] is selected.
• Writing data takes more time than in normal recording. It will take for about 40 seconds.
Recording images in macro

1. Set the PLAY/STILL/MOVIE selector to MOVIE or STILL.
2. Set the FOCUS AUTO/MANUAL switch to AUTO.
3. Press (macro).

   The (macro) indicator appears on the LCD screen or on the viewfinder.
   With the zoom lever set to the W side, you can shoot a subject that is about 13/16 inch (2 cm) away from the lens surface in macro mode.

To return to normal recording mode

Press (macro) again. The (macro) indicator disappears.

Notes

- You cannot record images in macro with the following PROGRAM AE modes:
  - Landscape mode
  - Panfocus mode
- You cannot record images in macro if the (macro) indicator appears.

Focusing manually

Normally the focus is automatically adjusted. The manual focus function is convenient to focus the subject such as under dark situations.

1. Set the PLAY/STILL/MOVIE selector to MOVIE or STILL.
2. Set the FOCUS AUTO/MANUAL switch to MANUAL.

   The (manual focus) indicator appears on the LCD screen or on the viewfinder.

3. Turn the focus ring to achieve a sharp focus.

   When you shoot still images, the image on the LCD screen or on the viewfinder is enlarged (double*) and the focal point information appears while the focus is being adjusted. After adjusting, the image returns to normal size. The range is from 13/16 inch (2 cm) to \( \infty \) (infinity).

   * When using the digital zoom function, the enlarged image will be less than double size.

To reactivate auto focusing

Set the FOCUS AUTO/MANUAL switch to AUTO.
Notes

- Focal point information may not completely show the correct distance. Use the information as a guide.
- Focal point information does not show the correct distance when attaching the conversion lens.
- If you shoot a subject within 31 1/2 inches (0.8 m) while the zoom lever is set to T side, you cannot get a clear focus. In such cases, the focal point information flashes. Move the zoom lever to the W side until the indicator stops flashing.
- You cannot adjust the focus manually if you have selected the Panfocus mode in the PROGRAM AE function.

Using the PROGRAM AE function

1 Set the PLAY/STILL/MOVIE selector to MOVIE or STILL.

2 Press PROGRAM AE repeatedly to select the desired PROGRAM AE mode.

Aperture priority mode

For making the subject stand out against an unclear background or providing a larger in-focus range. Press PROGRAM AE +/– repeatedly to select an aperture value in 9 steps from F2.8 to F11.

Shutter speed priority mode

For recording a sharp picture of a fast-moving subject or recording the flow of motion of a moving subject. Press PROGRAM AE +/– repeatedly to select a shutter speed in 17 steps from 8” to 1/500 when recording a still image, or in 11 steps from 1/8 to 1/500 when recording a moving image.

Twilight mode

Suppresses the blurring of colors of a bright subject in a dark place so that you can record the subject without losing the dark atmosphere of the surroundings.
To cancel PROGRAM AE
Press PROGRAM AE repeatedly until the indicator on the LCD screen or on the viewfinder goes out.

Notes
- You can focus only on distant subjects in Landscape mode.
- In Panfocus mode, the zoom position is set to the W side and focus is fixed.
- When you record in Twilight plus mode, we recommend that you use a tripod to prevent shaking.
- Set the forced flash $ when you use the flash in the following modes:
  - Twilight mode
  - Twilight plus mode
  - Landscape mode
- You cannot use the PROGRAM AE function when [REC MODE] is set to [TEXT].
- If the setting is not appropriate in Aperture priority mode and Shutter speed priority mode, the setting value indicator on the LCD screen or on the viewfinder flashes when you press the shutter button. In this case, reset the value.
- If you select a slow shutter speed in Twilight plus mode or select Shutter speed priority mode, the image may not be clear.

Using the Spot light-metering function
Select this mode when there is backlight or when there is strong contrast between the subject and the background, etc.

Press SPOT METER to activate the spot light-metering function. Position the point you want to record at the spot light-metering cross hair.

Twilight plus mode
Increases the effectiveness of the twilight mode function.

Landscape mode
Focuses only on a distant subject to record landscapes, etc.

Panfocus mode
Changes the focus quickly and simply from a close subject to a distant subject.

Using the Spot light-metering function
Select this mode when there is backlight or when there is strong contrast between the subject and the background, etc.

Press SPOT METER to activate the spot light-metering function. Position the point you want to record at the spot light-metering cross hair.

Twilight plus mode
Increases the effectiveness of the twilight mode function.

Landscape mode
Focuses only on a distant subject to record landscapes, etc.

Panfocus mode
Changes the focus quickly and simply from a close subject to a distant subject.
Adjusting the exposure (EXPOSURE)

1. Set the PLAY/STILL/MOVIE selector to MOVIE or STILL.
2. Select [CAMERA] and then [EXPOSURE] from the menu.
3. Select the desired exposure value.
   Adjust the exposure value while checking the brightness of the background. You can select values ranging from +2.0 EV to -2.0 EV in steps of 1/3 EV.

Note
If a subject is under extremely bright or dark situations, or the flash is used, the exposure adjustment may not be effective.

Adjusting the white balance (WHITE BALANCE)

Normal white balance is automatically adjusted.

1. Set the PLAY/STILL/MOVIE selector to MOVIE or STILL.
2. Press WHITE BALANCE repeatedly to select the desired white balance setting.
   
   IN DOOR ( ): Places where the lighting condition changes quickly
   - Under bright lighting such as photography studios
   - Under sodium or mercury lamps
   
   OUTDOOR ( ): Recording a sunrise/sunset, night scene, neon signs, or fireworks

One-push white balance ( ): Adjusting the white balance depending on the light source

AUTO (No indicator): Adjusts the white balance automatically

To shoot in one-push white balance mode
1. Press WHITE BALANCE repeatedly until the indicator appears.
2 Shoot a white object such as paper full under the same situation you will shoot.
3 Press .
The indicator flashes quickly. When the white balance has been adjusted and stored in the memory, the indicator stops flashing.

To reactivate auto adjustment
Select [AUTO] in step 2.

Notes
- Select [AUTO] when shooting with fluorescent lighting.
- The indicator means:
  Slow flashing: white balance is not set.
  Quick flashing: white balance is being adjusted (after you pressed ).
  Lit steady: white balance has been set.
- If the indicator keeps flashing even when you press , record in automatic white balance mode.

Recording the date and time on the still image (DATE/TIME)

1 Set the PLAY/STILL/MOVIE selector to STILL.
2 Select [EFFECT] and then [DATE/TIME] from the menu.
3 Select the date and time.
   DAY & TIME
   Imposes the date, hour, and minute.
   DATE
   Imposes the year, month, and day.
   OFF
   Does not impose the date and time.
4 Record the image.
The date and time do not appear on the LCD screen or on the viewfinder during shooting, these appear during playback only.
Enjoying picture effects (PICTURE EFFECT)

1 Set the PLAY/STILL/MOVIE selector to MOVIE or STILL.

2 Select [EFFECT] and then [P. EFFECT] from the menu.

Select the desired mode.

SOLARIZE
The light contrast is clearer and the picture looks like an illustration.

B&W
The picture is monochrome (black and white).

SEPIA
The picture is sepia-toned like an old photograph.

NEG.ART
The color and brightness of the picture are reversed as in a negative.

OFF
Does not use the picture effect function.

To cancel picture effect
Select [OFF] in step 2.
Various playback

Playing back six images at once (INDEX)

1 Set the PLAY/STILL/MOVIE selector to PLAY.
2 Select [INDEX] on the LCD screen or on the viewfinder. Six images are displayed at once (index screen).

This shows the position of the currently displayed images relative to all the recorded images.

The following marks are displayed on each image according to the image type and settings.

- Moving image file
- Voice memo file
- E-mail file
- Print mark
- Protect mark
- TEXT: TEXT file
- TIFF: TIFF mark
(No mark): Normal recording (no settings)

To display the next (previous) index screen
Select ▲/▼ at the lower-left on the LCD screen or on the viewfinder.

Displays the previous index screen.
Displays the next index screen.

To return to normal playback (single image)
- Select the desired image with the control button.
- Select ◄ (Return).

Note
Images shot in TEXT mode cannot be displayed on the INDEX screen.
Enlarging a part of the still image (Zoom and trimming)

1 Set the PLAY/STILL/MOVIE selector to PLAY.
2 Display the image to be enlarged.
3 Zoom in/out the image with the zoom lever.
   The zoom scaling indicator appears on the LCD screen or on the viewfinder.
4 Press the control button repeatedly to trim the image.
   ▲: The image moves downward
   ▼: The image moves upward
   ◀: The image moves rightward
   ▶: The image moves leftward

To return to the normal size
Zoom out with the zoom lever until the zoom scaling indicator (×1.1) disappears from the screen, or simply press the center ▶.

To record an enlarged image (trimming)
1 Enlarge the image.
2 Press the shutter button. The image is recorded at 640×480 size and the image on the LCD screen or on the viewfinder returns to the normal size after recording.

Notes
• You cannot use this function on moving images, TEXT mode images, or uncompressed images.
• Zoom scaling is up to 5x regardless of the original image size.
• The quality of enlarged images may be deteriorated.
• The original data is left even if you enlarge the image.
• The enlarged image is recorded as the newest file.
• If you trim an image, the disc space will be decrease.
• If the disc space is not sufficient, you may not be able to trim an image.
Rotating a still image (ROTATE)

1 Set the PLAY/STILL/MOVIE selector to PLAY.
2 Display the image to rotate.
3 Select [FILE] and then [ROTATE] from the menu.
4 Rotate the image clockwise or counterclockwise, then select [RETURN].

Notes
- You may not be able to rotate protected images or images recorded with other equipment.
- Also, when viewing images on a personal computer, the image rotation information may not be reflected depending on the application software.
- You cannot rotate protected or uncompressed images, or images recorded in TEXT mode.
- If you rotate an image, the disc space will decrease.
- If the disc space is not sufficient, you may not be able to rotate an image.

Playing back the still images in order (SLIDE SHOW)

This function is useful for checking the recorded images or for presentations, etc.

1 Set the PLAY/STILL/MOVIE selector to PLAY.
2 Select [FILE] and then [SLIDE SHOW] from the menu.
Set the following items.
INTERVAL
- You can select from 1 min (1 minute), 30 sec (30 seconds), 10 sec (10 seconds), or 5 sec (5 seconds).
REPEAT
- ON: Plays back images in a continuous loop (approximately 20 minutes) until [RETURN] is selected.
- OFF: After all images have been played back, the slide show ends.
3 Select [START] with the control button.
The slide show begins.

To cancel the slide show
Select [CANCEL] in step 2 or 3.
To skip to the next/previous image during the slide show
Select [◄ ►] at the lower-left on the screen.

Notes
• The interval setting time may vary depending on the image size.
• When [REPEAT] is set to [ON], the slide show does not end until all the images played back, even if it takes more than 20 minutes.

Viewing images on a TV screen
You can view images recorded onto a disc on a TV.

Set the TV/VIDEO switch to “VIDEO.”

1 Connect the A/V connecting cable to the A/V OUT (MONO) jack of your camera and to the audio/video input jacks of the TV.
If your TV has stereo type input jacks, connect the audio plug of the A/V connecting cable to the Lch jack.

2 Turn on the TV and start playback on your camera.
The playback image appears on the TV screen.

Note
You cannot use a TV that has an antenna (aerial) connector only.
Editing

Preventing accidental erasure (PROTECT)

The (protect) indicator appears on protected images.

![Image of camera with protect indicator]

In single mode

1 Set the PLAY/STILL/MOVIE selector to PLAY, then display the image to be protected.

2 Select [FILE], [PROTECT], and then [ON] from the menu. The displayed image is protected and the (protect) indicator appears.

To release protection

Select [OFF] in step 2.

In INDEX mode

1 Set the PLAY/STILL/MOVIE selector to PLAY, then display the INDEX screen.

2 Select [FILE], [PROTECT], and then [ALL] or [SELECT] from the menu.

3 When you select [ALL]

Select [ON]. All the images in the disc are protected.

When you select [SELECT]

Select all the images to be protected with the control button, then select [ENTER]. The selected images are protected.

To release protection

If you selected [ALL] in step 2, select [OFF]. If you selected [SELECT] in step 2, select the images to be unprotected with the control button, then select [ENTER].

Notes

• If you protect an image, the disc space will decrease.
• If the disc space is not sufficient, you may not be able to protect an image.
Deleting images (DELETE)

Protected images cannot be deleted.

1 Set the PLAY/STILL/MOVIE selector to PLAY, then display the image to be deleted.

2 Select [DELETE] and then [OK] from the menu. The image is deleted.

In INDEX mode

1 Set the PLAY/STILL/MOVIE selector to PLAY, then display the INDEX screen.

2 Select [DELETE] and then [ALL] or [SELECT] from the menu.

3 When you select [ALL]
Select [ENTER]. All the unprotected images are deleted.

When you select [SELECT]
Select all the images to be deleted with the control button, then select [ENTER]. The (delete) indicator appears on the selected images and these images are deleted.

To cancel deleting
Select [CANCEL] in step 2 or 3.

Notes
• You can delete images recorded on a disc, however, even if you delete images, the disc remaining space does not increase.
• If you delete an image, the disc space will decrease.
• If the disc space is not sufficient, you may not be able to delete an image.
• If the lower four-digit file number of an image is the same as the number of the selected image, that image also will be deleted.
Changing the recorded still image size (RESIZE)

1 Set the PLAY/STILL/MOVIE selector to PLAY, then display the image of which you want to change the size.

2 Select [TOOL] and then [RESIZE] from the menu.

3 Select the desired size. 1600×1200, 1024×768, 640×480. The resized image is recorded and the image on the LCD screen or on the viewfinder returns to the previous size after recording.

To cancel changing the size
Select [CANCEL] in step 3.

Notes
• When you change from a small size to a large size, the picture quality deteriorates.
• The original image is retained even after resizing.
• You cannot change the size of images recorded in TEXT mode, uncompressed image, or moving pictures.
• If you resize an image, the disc space will decrease.
• If the disc space is not sufficient, you may not be able to resize an image.
• The resized image is recorded as the newest file.

Selecting still images to print (PRINT MARK)

You can mark a print mark on still images recorded with your camera. This mark is convenient when you have images printed at a shop that conforms with the DPOF (Digital Print Order Format) standard.

In single mode

1 Set the PLAY/STILL/MOVIE selector to PLAY and display the image you want to print.

2 Select [FILE], [PRINT MARK], and then [ON] from the menu. The (print) mark is marked on the displayed image.

To remove the print mark
Select [OFF] in step 2.

In INDEX mode

1 Set the PLAY/STILL/MOVIE selector to PLAY, then display the INDEX screen.

2 Select [FILE], [PRINT MARK], and then [SELECT] from the menu.

3 Select the images to be marked with the control button.
4 Select [ENTER].
   The \( \text{D} \) marks on the selected images change from green to white.

To remove selected print marks
Select the images to be removed in step 3 with the control button, then select [ENTER].

To remove all the print marks
Select [FILE], [PRINT MARK], [ALL], and then [OFF] from the menu. The \( \text{D} \) marks on all images are removed.

Notes
- You cannot mark a print mark on moving images or TEXT mode images.
- If you mark an image recorded in TIFF mode with a print mark, only the uncompressed image is printed, and the JPEG image recorded at the same time is not printed.
- If you mark an image with a print mark, the disc space will decrease.
- If the disc space is not sufficient, you may not mark an image with a print mark.
Additional information

Precautions

On handling the camera
Do not carry the camera by holding the disc cover

Do not touch the rotating disc
This may cause serious injuries.

On pickup lens cleaning
When the pickup lens is dirty and the camera cannot read any image, clean the pickup lens using a commercially available blower.

Cleaning the camera surface
Clean the camera surface with a soft cloth slightly moistened with water, then wipe the surface dry. Do not use any type of solvent such as thinner, alcohol or benzene as this may damage the finish or the casing.

After using your camera at the seashore or other dusty locations
Clean your camera carefully. Otherwise, the salty air may corrode the metal fittings or dust may enter the inside of your camera, causing a malfunction.

On operating temperature
Your camera is designed for use between the temperatures of 32 °F to 104 °F (0 °C to 40 °C). Recording in extremely cold or hot places that exceed this range is not recommended.

On moisture condensation
If the camera is brought directly from a cold to a warm location, or is placed in a very damp room, moisture may condense inside or outside the camera. Should this occur, “DISC ERROR” appears and the camera will not operate properly.

Moisture condensation occurs easily when:
• The camera is brought from a cold location such as a ski slope into a warmly heated room.
• The camera is taken from an air-conditioned room or car interior to the hot outdoors, etc.

On cleaning

Cleaning the LCD screen or viewfinder
Wipe the screen surface with a cleaning cloth (not supplied) or an LCD cleaning kit (not supplied) to remove fingerprints, dust, etc.
How to prevent moisture condensation
When bringing the camera from a cold place to a warm place, seal the camera in a plastic bag and allow it to adapt to conditions at the new location over a period of time (about an hour).

If moisture condensation occurs
Turn off the camera and wait about an hour for the moisture to evaporate.
Note that if you attempt to record with moisture remaining inside the camera lens, you will be unable to record clear images.

On pickup lens
Do not touch the pickup lens inside the disc cover. And do not open the disc cover except when inserting or removing a disc to keep dust out.

On AC power adaptor
- Unplug the unit from the wall outlet (mains) when you are not using the unit for a long time. To disconnect the power cord (mains lead), pull it out by the plug. Never pull the power cord (mains lead) itself.
- Do not operate the unit with a damaged cord (mains lead) or if the unit has been dropped or damaged.
- Do not bend the power cord (mains lead) forcibly, or place a heavy object on it. This will damage the cord (mains lead) and may cause fire or electrical shock.
- Prevent metallic objects from coming into contact with the metal parts of the connecting section. If this happens, a short may occur and the unit may be damaged.
- Always keep metal contacts clean.
- Do not disassemble the unit.
- Do not apply mechanical shock or drop the unit.

On battery pack
- Use only the specified charger with the charging function.
- To prevent accident from a short circuit, do not allow metal objects to come into contact with the battery terminals.
- Keep the battery pack away from fire.
- Never expose the battery pack to temperatures above 140 °F (60 °C), such as in a car parked in the sun or under direct sunlight.
- Keep the battery pack dry.
- Do not expose the battery pack to any mechanical shock.
- Do not disassemble nor modify the battery pack.
- Attach the battery pack to the camera securely.
- Charging while some capacity remains does not affect the original battery capacity.

- While the unit is in use, particularly during charging, keep it away from AM receivers and video equipment. AM receivers and video equipment disturb AM reception and video operation.
- The unit becomes warm during use. This is not a malfunction.
- Do not place the unit in locations that are:
  — Extremely hot or cold
  — Dusty or dirty
  — Very humid
  — Vibrating

Do not touch the pickup lens inside the disc cover. And do not open the disc cover except when inserting or removing a disc to keep dust out.

On AC power adaptor
- Unplug the unit from the wall outlet (mains) when you are not using the unit for a long time. To disconnect the power cord (mains lead), pull it out by the plug. Never pull the power cord (mains lead) itself.
- Do not operate the unit with a damaged cord (mains lead) or if the unit has been dropped or damaged.
- Do not bend the power cord (mains lead) forcibly, or place a heavy object on it. This will damage the cord (mains lead) and may cause fire or electrical shock.
- Prevent metallic objects from coming into contact with the metal parts of the connecting section. If this happens, a short may occur and the unit may be damaged.
- Always keep metal contacts clean.
- Do not disassemble the unit.
- Do not apply mechanical shock or drop the unit.
On vanadium-lithium battery

Your camera is supplied with a vanadium-lithium battery installed so as to retain the date and time, etc., regardless of the setting of the POWER switch. The vanadium-lithium battery is always charged as long as you are using your camera. The battery, however, will get discharged gradually if you do not use your camera. It will be completely discharged in about six months if you do not use your camera at all. Even if the vanadium-lithium battery is not charged, it will not affect the camera operation. To retain the date and time, etc., charge the battery if the battery is discharged.

Charging the vanadium-lithium battery:

• Connect your camera to house current (mains) using the AC power adaptor supplied with your camera, and leave your camera with the power turned off for more than 24 hours.
• Or install the fully charged battery pack in your camera, and leave your camera with the power turned off for more than 24 hours.

If any problem occurs, unplug your camera and contact your nearest Sony dealer.

On discs

Be sure to use only 8 cm CD-Rs. You cannot read or write data on other type discs that does not correspond to this camera.

On cleaning

• Do not clean a disc using a cleaner before recording. Use a commercially available blower to remove dust.
• If fingerprints, dust, drop of water, or oil makes the blue side of a disc dirty, the camera may not properly record an image on the disc. You should handle a disc with a lot of care.
• If a disc does become dirty, wipe it in a straight line from center to edge with a soft dry cloth or a soft cloth lightly moistened with a mild detergent solution. You can use a commercially available CD cleaner.

• Do not use any solvent (benzine, thinner, static protection product, record cleaner, etc.) to clean a disc.
**Notes**

- Do not remove the disc while reading or writing data.
- Data may be damaged if:
  - You remove the disc or turn off the power while reading or writing data.
  - You use the camera in a location subject to the effects of static electricity or noise.
- Do not attach any material on the surface of a disc. This causes a nonuniform rotating speed and this may cause a malfunction of the camera.
- You can write only on the label surface of a disc. When you write, use only a felt-tip marker and do not touch it until it is in dry state, and do not heat it. Do not use a sharp-pointed tool, such as a ballpoint pen.
- Hold a disc at the edges while pressing the center hole lightly. Do not touch the blue side of a disc.

- When you carry or store a disc, put it in its case.
- Do not strike, bend or drop a disc.
- Do not rub the edge of a disc.
- If you play back the disc on which any image has not been recorded using a CD-ROM drive, the CD-ROM drive may malfunction or the disc may be scratched.

---

**Using your camera abroad**

**Power sources**

You can use your camera in any country or area with the supplied battery charger within 100 V to 240 V AC, 50/60 Hz. Use a commercially available AC plug adaptor [a], if necessary, depending on the design of the wall outlet (mains) [b].

---

**Watching the playback picture on TV**

If you want to view the playback picture on a TV, you need a TV having a video input jack and a video connecting cable. The color system of the TV must be the same as that of your digital still camera. TV color systems differ from country to country. Check the following list:

**NTSC system countries**
Bahama Islands, Bolivia, Canada, Central America, Chile, Colombia, Ecuador, Jamaica, Japan, Korea, Mexico, Peru, Surinam, Taiwan, the Philippines, the U.S.A., Venezuela, etc.

**PAL system countries**
Australia, Austria, Belgium, China, Denmark, Finland, Germany, Great Britain, Holland, Hong Kong, Italy, Kuwait, Malaysia, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, Thailand, etc.

**PAL-M system country**
Brazil

**PAL-N system countries**
Argentina, Paraguay, Uruguay

**SECAM system countries**
Bulgaria, Czech Republic, France, Guiana, Hungary, Iran, Iraq, Monaco, Poland, Russia, Slovak Republic, Ukraine, etc.
Troubleshooting

If you experience trouble with your camera, first check the following items. Should your camera still not operate properly after you have made these checks, consult your Sony dealer or local authorized Sony service facility. If code displays (C:□□□□) appear on the LCD screen or on the viewfinder, the self-diagnosis display function is working (page 73).

### Warning and notice messages

Various messages appear on the LCD screen or on the viewfinder. Check the corresponding descriptions in the following list.

<table>
<thead>
<tr>
<th>Message</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>COVER OPEN</td>
<td>The disc cover is opened.</td>
</tr>
<tr>
<td>NO DISC</td>
<td>No disc has been inserted.</td>
</tr>
<tr>
<td>DRIVE ERROR</td>
<td>There is trouble with the disc drive or disc.</td>
</tr>
<tr>
<td>DISC ERROR</td>
<td>An unusable disc is inserted.</td>
</tr>
<tr>
<td></td>
<td>There is trouble with the disc.</td>
</tr>
<tr>
<td></td>
<td>A moisture condensation has occurred inside the camera.</td>
</tr>
<tr>
<td>DISC PROTECT</td>
<td>The disc was protected with a computer.</td>
</tr>
<tr>
<td>DIRECTORY ERROR</td>
<td>The same directory exists.</td>
</tr>
<tr>
<td>NOT ENOUGH DISC SPACE</td>
<td>The remaining capacity of the disc is not enough to operate other than executing the finalization.</td>
</tr>
<tr>
<td>NOT INITIALIZED</td>
<td>Since the disc has not been initialized, the camera cannot record any image on the disc.</td>
</tr>
<tr>
<td>ALREADY INITIALIZED</td>
<td>It is not necessary to execute the initialization, the disc was initialized.</td>

Self-diagnosis display

Your camera has a self-diagnosis display. This function displays the camera condition on the LCD screen or on the viewfinder with a combination of a letter and four digits of numbers. If this appears, check the following code chart. The code informs you of the camera’s current condition. The last two digits (indicated by □□) will differ depending on the state of the camera.

<table>
<thead>
<tr>
<th>Code</th>
<th>Cause and/or Corrective Action</th>
</tr>
</thead>
</table>
| C:32:□□ | • There is trouble with the disc drive.  
  ➔ Turn the power off and on again. |
| C:13:□□ | • A disc not compatible with this camera is inserted.  
  ➔ Change the disc (page 14). |
| E:61:□□ | • A camera malfunction that you cannot repair has occurred.  
  ➔ Contact your Sony dealer or local authorized Sony service facility and inform them of the 5-digit service code (example: E:61:10). |
| E:91:□□ | |

If you are unable to rectify the problem even if you try corrective actions a few times, contact your Sony dealer or local authorized Sony service facility.
Specifications

System
Image device
1/2.7 type color CCD
Lens
10x zoom lens
f = 1/4 – 2 3/8 in (6.0 – 60.0 mm) (1 9/16 – 15 3/8 in (39 – 390 mm) when converted into a 35 mm still camera)
F = 2.8

Exposure control
Automatic exposure
White balance
Automatic, Indoor, Outdoor, One-push

Data compression system
Movie: MPEG1
Still: JPEG, TIFF, GIF (in TEXT mode)
Audio (with still image): MPEG AUDIO (Monaural)

Recording medium
8 cm CD-R

Flash
Recommended recording distance: 23 5/8 in to 8 1/3 feet (0.6 m to 2.5 m)

Drive
Read: Maximum x8
Write: x4

Readout
Noncontact optical readout (using semiconductor laser)

Laser
Wavelength: 777 to 787 nm
NA: 0.5
Maximum output: 23 mW
Emission duration: 600 ns

Input and Output connector
A/V OUT (MONO) jack (Monaural)
Minijack Video: 1 Vp-p, 75 Ω unbalanced, sync negative
Audio: 327 mV (at a 47 kΩ load)
Output impedance: 2.2 kΩ

DIGITAL I/O jack
4-pin connector
External flash jack
Minijack

LCD screen
LCD panel
TFT (Thin Film Transistor active matrix) drive

LCD size
2.5 type
Total number of dots
123 200 (560×220) dots

Viewfinder
LCD panel
TFT (Thin Film Transistor active matrix) drive
Total number of dots
180 000 (800×225) dots

General
Application
Sony battery pack NP-F550

Power requirements
8.4 V

Power consumption
(During shooting)
4.9 W (When using the LCD screen)
4.5 W (When using the viewfinder)

Operation temperature
32 °F to 104 °F (0 °C to 40°C)

Storage temperature
–4 °F to +140 °F (-20 °C to +60 °C)

Maximum dimensions
5x1 9/16x2 1/2 in (125x39x62 mm) (w/h/d)
Mass
Approx. 10 oz (280 g)

NP-F550 battery pack
Used battery
Lithium ion battery
Maximum voltage
DC 8.4 V
Nominal voltage
DC 7.2 V

Capacity
10.8 Wh (1 500 mAh)

Accessories
AC-L10A/L10B/L10C
AC power adaptor
Power cord (mains lead) (1)
NP-F550 battery pack (1)
A/V connecting cable (1)
USB cable (1)
8 cm CD adaptor (1)
Mavica disc (5)
Shoulder strap (1)
Lens cap (1)
Lens cap strap (1)
CD-ROM (3)
Operating instructions (3)

Design and specifications are subject to change without notice.
LCD screen/viewfinder indicators

The indicators during recording

1. Sharpness indicator
2. Focus mode indicator/Macro indicator
3. Battery remaining indicator
4. Flash level indicator/Flash mode indicator
5. PROGRAM AE indicator/Zoom indicator
6. White balance indicator
7. SteadyShot indicator
8. Picture effect indicator
9. Date and time indicator
10. EV level indicator
11. Iris/Shutter speed indicator
12. AE lock indicator/Focus lock indicator
13. Recording mode indicator
14. Image size indicator
15. Number of recorded images
16. Remaining disc capacity indicator
   This indicator changes to after executing the finalization.
17. Recording time indicator
18. Self-diagnosis function indicator/Recording time indicator
19. Self-timer indicator
20. Spot light-metering indicator
21. Menu bar and guide menu
   They appear by pressing ▲ on the control button and disappear by pressing ▼.
The indicators during still image playback

1. Protect indicator/Zoom scaling indicator
2. Print mark of the playback image
3. Recording mode of the playback image
4. Image size indicator
5. File name*
6. Remaining disc capacity indicator
7. Number of stored images on a disc
8. Image number
9. Recording date of the playback image*

* When the menu bar is displayed, this indicator disappears from the screen.

The indicators during moving image playback

1. Moving image file indicator
2. Image size indicator
3. Playback button
   - is displayed during stop, and during playback.
4. Image searching buttons
5. Menu bar and guide menu
6. Remaining disc capacity indicator
7. Counter

8. Image number/number of stored images on a disc
9. Playback image
10. Playback bar
